

AIRSTREAM OF MINNESOTA

Transmission Service **\$450** **\$500** GAS DIESEL

What our RV service technicians do:

- Visual inspection of transmission line
- Visual inspection of transmission fittings
- Drain transmission fluid

Why your RV needs it:

Regular inspection and servicing of the RV transmission system ensures proper operation and helps prevent future motorhome repairs.

*Rates do not include taxes, shop supplies, or any applicable fees. Required changes to service may result in additional charges. Some areas or locations may have limited offerings.

AIRSTREAM OF MINNESOTA

Slide & Jack Service **\$350**

What our RV service technicians do:

- Test RV slide outs for proper operation
- Clean slide walls
- Lubricate exterior slide seals
- Lubricate all interior RV slide components
- Check applicable hydraulic lines
- Ensure proper operation of control board
- Clean all RV jacks, including foot pads
- Lubricate jacks, rams and gears

Why your RV needs it:

Exterior slide gaskets are rubber and will harden if not properly maintained and conditioned. On some systems, RV slide rails and gears need to be cleaned and lubricated regularly. Jacks also need to be serviced regularly to protect the seals and prevent debris from building up and working its way up into the jack assembly.

*Rates do not include taxes, shop supplies, or any applicable fees. Required changes to service may result in additional charges. Some areas or locations may have limited offerings.

AIRSTREAM OF MINNESOTA

RV Appliance Service **\$350**

What our RV service technicians do:

- Check operation of water heater
- Clean compartment tube assembly (excludes diesel fuel heaters)
- Check operation of refrigerator
- Clean burner tube assembly
- Visually inspect RV rooftop air-conditioning units
- Replace filters, as needed
- Check operation of stove
- Clean galley stove burners of debris
- Ensure proper air mixture
- Check operation of furnace
- Clean furnace of dirt and debris

Why your RV needs it:

Many RV appliances have liquid propane (LP) systems, and it is very important to keep the burn chambers properly cleared of debris to protect you, your family and your recreational vehicle.

*Rates do not include taxes, shop supplies, or any applicable fees.

AIRSTREAM OF MINNESOTA

Roof AC Service **\$530** PER UNIT

What our RV service technicians do:

- Visually inspect the RV air conditioning unit
- Remove AC units and acid wash
- Clean AC coils
- Perform amp draw test
- Clean drains
- Replace AC gaskets and filters

Why your RV needs it:

To help prevent debris and build up, which can negatively impact the quality of air, bog down the AC system and lead to costly AC repair.

*Rates do not include taxes, shop supplies, or any applicable fees. Limited roof AC units may result in additional charges. Some areas or locations may have limited offerings.

AIRSTREAM OF MINNESOTA

Roof Scrape & Reseal **\$40** PER FOOT

What our RV service technicians do:

- Rain bay unit
- Inspect roof seams
- Inspect roof clearance lights
- Inspect roof vent colors
- Inspect roof antenna
- Inspect ladder
- Remove sealant from all above-mentioned areas.
- Reveal entire roof seams & components w/ factory-specified silicone
- Allow to cure overnight
- Rain bay unit to identify leaks

Why your RV needs it:

Prevent costly interior damage—resealing your roof ensures long-term protection from water intrusion, preserving the structure and integrity of your RV.

*Rates do not include taxes, shop supplies, or any applicable fees. Required changes to service may result in additional charges. Some areas or locations may have limited offerings.

AIRSTREAM OF MINNESOTA

Premium RV Generator Service **\$300** **\$500** GAS DIESEL

What our RV service technicians do:

- Replace generator oil filter
- Replace generator oil
- Replace generator air filter
- Replace generator fuel filter
- Inspect generator exhaust

Why your RV needs it:

Annual RV generator service is essential as the fibers in your oil, air, and fuel filters break down after roughly 12 months of use. When that happens, your filters no longer perform as they should.

*Rates do not include taxes, shop supplies, or any applicable fees. Required changes to service may result in additional charges. Some areas or locations may have limited offerings. Synthetic oil available at additional cost.

AIRSTREAM OF MINNESOTA

Motorized Brake & Axle Service **\$800** **\$1,200** GAS DIESEL

What our RV service technicians do:

- Check brakes for proper operation
- Test for amp on each wheel
- Remove tire, drum, and hub and inspect shoes
- Adjust brakes to proper settings
- Inspect wheel bearings and repack as necessary
- Check and adjust tire air pressures

Why your RV needs it:

Annual RV brake inspection and service helps detect potential problems and ensure proper brake operation.

*Price for single axle, double axle (DBS), Triple axle (TAS) RVs do not include taxes, shop supplies, or any applicable fees.

AIRSTREAM OF MINNESOTA

Generator Oil Service **\$200** **\$350** GAS DIESEL

What our RV service technicians do:

- Replace generator oil filter
- Replace oil
- Inspect exhaust

Why your RV needs it:

Annual RV generator service is essential as the filters in your oil, air, and fuel filters break down after roughly 12 months of use.

*Price does not include taxes, shop supplies, or any applicable fees. Required changes to service may result in additional charges. Some service locations may have limited offerings. Synthetic oil available at additional cost.

AIRSTREAM OF MINNESOTA

Filter Change Service **\$450**

What our RV service technicians do:

- Change hydraulic filters (3 filters)
- Change fuel filters
- Top off coolant

Why your RV needs it:

Routine RV engine maintenance helps prevent future coach repairs (refer to owner's manual for recommended maintenance schedule).

*Price does not include taxes, shop supplies, or any applicable fees. Coolant filler and coolant additional charge. Required changes to service may result in additional charges. Some service locations may have limited offerings.

AIRSTREAM OF MINNESOTA

Engine Oil & Filter Service **\$300** **\$400** **\$350** GAS DIESEL SPRINTER/MERCEDES

What our RV service technicians do:

- Replace engine oil in your motorhome
- Gas - up to 8 quarts
- Diesel - up to 24 quarts
- Mercedes/Sprinter - up to 14 quarts synthetic
- Replace engine oil filter
- Complete front-end chassis lube

Why your RV needs it:

Routine RV engine maintenance helps prevent future coach repairs (refer to owner's manual for recommended maintenance schedule).

*Price does not include taxes, shop supplies, or any applicable fees. Required changes to service may result in additional charges. Some service locations may have limited offerings. All synthetic oil, synthetic oil available at additional cost.

AIRSTREAM OF MINNESOTA

Dash AC Heat Inspection **\$150** PER UNIT

What our RV service technicians do:

- Visually inspect AC unit
- Check fans
- Check for leaks
- Check for cooling

Why your RV needs it:

Ensure your comfort and safety year-round—this inspection helps detect issues early, preventing costly breakdowns and keeping your cabin climate-controlled in any weather.

*Price per AC unit and does not include taxes, shop supplies, or any applicable fees. Limited roof AC vent access could be an additional charge. Service will be provided. Required changes to service may result in additional charges. Some service locations may have limited offerings.

AIRSTREAM OF MINNESOTA

Coolant Service **\$400** **\$450** GAS DIESEL

What our RV service technicians do:

- Visual inspection of hoses
- Visual inspection of clamps
- Visual inspection of heater hoses
- Drain coolant
- Fill with new coolant

Why your RV needs it:

Maintaining your engine's cooling system prevents your motorhome's engine from overheating, which can lead to costly coolant service repairs.

*Include up to three gallons of coolant for gas coaches and 12 gallons of coolant for diesel coaches. If extra coolant is required, it is \$11.00 per gal. RVs do not include taxes, shop supplies, or any applicable fees. Required changes to service may result in additional charges. Some service locations may have limited offerings.

RV Brake & Axle Service **STARTING AT \$350**

What our RV service technicians do:

- Check brakes for proper operation
- Test for amp on each wheel
- Remove tire, drum, and hub
- Inspect RV brake shoes for excessive wear
- Check brake wiring
- Adjust brakes to proper settings
- Inspect wheel bearings and repack (as necessary)
- Check and adjust air pressure in RV tires.

Why your RV needs it:

Annual RV brake inspection and service helps detect potential problems and ensure proper brake operation.

*Price for single axle. Double axle \$385. Triple axle \$420. Price does not include taxes, shop supplies, or any applicable fees.

Body Reseal **\$42 PER FOOT**

What our RV service technicians do:

- Clean and scrape all side - body seams
- Clean and scrape all windows (except windshield)
- Apply original equipment self-leveling sealer
- Rain bay unit and test for leaks

Why your RV needs it:

Protect your RV from costly water damage—resealing seals out leaks before they start, preserving your investment and ensuring worry free travel in any weather.

*Service includes all necessary material. Final pricing may vary based on the condition of existing seals and any additional repairs required upon inspection.

RV Battery Service **\$350**

What our RV service technicians do:

- Clean battery tray
 - Test batteries
 - Top off fluid
- Up to 6 house and chassis batteries

Why your RV needs it:

With regular maintenance, you will achieve maximum performance and longer RV battery life.

*Includes up to 6 house and RV chassis batteries. Prices do not include taxes, shop supplies, or any applicable fees. Required charges to service may result in additional charges. Some services locations may have limited offerings.

Aqua-Hot® Service **\$350**

What our RV service technicians do:

- Inspect Aqua-Hot System
- Replace the nozzle
- Replace fuel filter
- Top off boiler fluid
- Check electrode alignment
- Clean the burn chamber
- Check fuel lines
- Check fuel pressure

Why your RV needs it:

With regular maintenance the Aqua-Hot® system runs more efficiently and puts off less smoke during operation.

*Add \$40 for metal roof access or hard hat (see item #2). Payover \$ for additional cost. Prices do not include taxes, shop supplies, or any applicable fees. Required charges to service may result in additional charges. Some services locations may have limited offerings.

Air Dryer Service **\$350**

What our RV service technicians do:

- Inspect the air dryer
- Replace air dryer filter

Why your RV needs it:

The air dryer is a very important filtering device in the air leveling and air brake systems of your motorhome; it absorbs any moisture trying to enter the systems.

*Price does not include taxes, shop supplies, or any applicable fees. Required charges to service may result in additional charges. Some services locations may have limited offerings.
