It is important for your safety and enjoyment that you are aware of the weights
and tow ratings of the RV you select. Consult a competent advisor for questions or
advice. Whether you are new to RVing or a veteran, get a feel for the performance
of your RV before heading out on the roadways. When you tow a vehicle with your
RV, you must drive differently than when you drive a single vehicle. Practice hooking
up, driving, backing up and braking in a safe environment or seek out professional
instruction. Jayco affixes a weight label to each RV which lists weight information
for that vehicle. Refer to that label to verify the vehicle will meet your requirements.
Gross Vehicle Weight Rating (GVWR): The maximum permissible weight of the
motorhome, including the Unloaded Vehicle Weight (UVW) plus passengers, personal
items, all cargo, fluids, options and dealer-installed accessories. The GVWR is equal to
or greater than the sum of the UVW and the Cargo Carrying Capacity. Gross Combined
Weight Rating (GCWR): The maximum allowable combined weight of the motorhome
used as a tow vehicle and the attached towed vehicle.
